6. Advance warehousing
7. RouteCTRL

Story

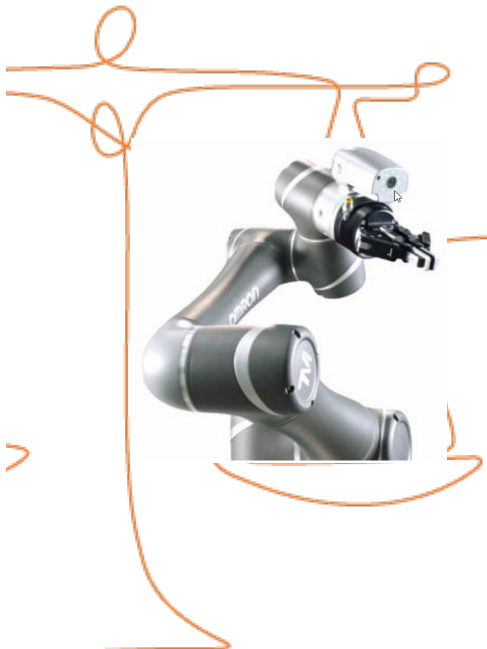

Fusion5 has purchased a Robotic company, made up of an Online B2B sales and Manufacturing arm.

Fusion5 setup Dynamics 365 Finance and Operations to take over managing the company Supply chain and Manufacturing operations. Today we are going to demo, The B2B Ecommerce, Manufacturing and Supply Chain, this will be an end-to-end demonstration, introduce an ISV called RouteCTRL, and we will show the new Fusion5 B2B Template for E-commerce

RouteCTRL ISV, This will be used to deliver the order product to the customers with Sign on glass and delivery tracking.

We will introduce the use of AI, and how it can support your operation.

They have secured some high-profile customers, Stark Industries, USR Robots and more. They have requested a high level of security, and you will see this today.

Dynamics 365 for Finance and Operations is a Microsoft's enterprise resource planning (ERP) solution that helps enterprises handle critical business functions such as finance, accounting, production, warehousing, and transportation management. It also provides financial reporting, embedded analytics, and AI-driven insights
